

21 October 1964

MEMORANDUM FOR: [REDACTED] C/DIAPL-2,
Room 3 E 236, Pentagon

25X1

SUBJECT: Analysis of Consolidated Intelligence Program, 1964

Herewith are copies 7 through 16 of the Investment Analysis of DOD Consolidated Intelligence Program, and the same number of copies of my covering memorandum to D/DCI/NIPE dated 27 August 1964 which outlines the Community "census" idea we have been discussing.

We made twenty copies of the CIP analysis, you will now have received 14 copies; I am holding a copy (# 1) for the DCI, one (# 2) for John Bross, one (# 20) for myself, and three (#17, 18 and 19) in reserve.

If you give copies to others in DOD, I would appreciate your advising them that although my covering memorandum describing the "census project" is based on the DCF's needs as I see them, it is my view that General Carroll has an equal need for this type of Community wide data, as do most of the other USIB members. In other words, this project to be really effective must be an effort of, by and for the Intelligence Community.
